Motivational letter (max 250 words):

I am fortunate enough over the past years to have been on various Teams in Germany that have challenged and supported me to become a better player and to continually work on myself. Since preparation began for the WILC 2019 I developed a drive to play and to train as I saw what was possible but also how long the road was still ahead of me. After training for two years basically all year long and having made it onto the U20 German Field Team and National Box team and actually being able to make an impact in these Teams, I decided that I wanted to make the next step. I managed get in contact with some Junior Teams in Vancouver and was planning to go there in March of 2020 when the season and everything else got cancelled due to Covid-19. While I was personally crushed that I was not able to go and fulfill my biggest dream, it didn't take away my drive and my desire to play at the next level. Since the return to play in May I have started training again and my passion to go over to Canada to play Junior Lacrosse is as strong as ever.

This Summer I was travelling to play in the Frank Menschner Cup in Prague and I also played in the Czech Box Lacrosse League. I was travelling as much as I could for every bit of Lacrosse that was available, and I am willing to travel across the Ocean to play in Canada and give it everything I have.
